

GARRETT MIRROR SUPPORT CO., INC.  
Lexington, NC (336) 248-8806  
Instructions for attaching mirror supports  
All Brackets and Screws packed inside interlocking supports.

Step 1: Attach each support to the back of your mirror frame using one screw at the top and one bracket at the bottom as shown. Note: By letting the supports hang from the top screw, they will automatically “self-level”

Step 2: Determine placement of the brackets on back of dresser so that they will be vertically aligned with brackets on the mirror. Fasten two brackets at the top edge of the dresser, and fasten two brackets to the “blind rail” as detailed above. Important: The solid “blind rail” can be located by removing the drawers of the chest. Some furniture may not include a “blind rail”.

Step 3: Insert mirror supports attached to mirror through brackets mounted onto the chest. Move mirror to desired height and tighten set screws.

Dear Customer,

The employees of Garrett Mirror Support Co. would like to thank you for the purchase of our products. Should your furniture arrive with additional attachment devices such as wooden or metal strips, please discard these at this time and follow the above instructions.

Once again, thank you for your purchase!

Sincerely,  
The employees of Garrett Mirror Support Co.
